

## Combined Urinalysis Control

UA-Cellular Complete is a comprehensive combined chemistry and micro urinalysis control designed specifically for the Siemens CLINITEK Atlas<sup>®</sup>/Sysmex<sup>®</sup> UF-1000i<sup>™</sup> and the Arkray AUTION HYBRID<sup>™</sup> AU-4050 integrated urinalysis systems.

It is designed to align six stabilized urine particle types (RBC, WBC, cast, crystals, bacteria and epithelial) with the common urine chemistry analytes found in a patient sample.

UA-Cellular Complete contains both chemistry analytes and cellular components to more closely mimic a patient sample. Technologists can use one control to test both the chemistry and micro platforms of the integrated systems. The complexity of UA-Cellular Complete makes it unique from other combined urine chemistry and micro controls on the market.

Stability - Store 2 °C - 10 °C	
Closed-vial	105 days
Open-vial	30 days

The product is packaged in convenient 120 mL squeeze bottles with a flip-top cap that accurately dispenses the amount of control needed into sample tubes without waste.

**Level-PC Control** – Serves as the positive chemistry control for the urine chemistry parameters that do not align with a corresponding urine particle type (i.e., glucose, bilirubin, ketones and urobilinogen).

**Level-PCM Control** – Serves as the positive chemistry control for the urine chemistry parameters that align with a corresponding urine particle type.

**Level-NC Control** – Serves as the “normal” control for all qualitative and semi-quantitative urine chemistry analytes and the quantitative urine particle types. L-NC will also test positive for protein and hCG.

Chemistry analytes		Cell parameters
Glucose	Bilirubin	RBC
Ketones	Specific Gravity	WBC
Blood	pH	EC
Protein	Urobilinogen	Casts
Nitrite	Leukocytes	Bacteria
Color	Clarity	Crystals

\*The Siemens Status Series, manual urine chemistry test methods, and pregnancy hCG test are now on the assay.

### STATS<sup>®</sup>

Introducing Streck’s updated Interlaboratory Quality Control program featuring online accessibility with enhanced real-time reporting and improved account management capability. Open to all customers at no charge, the Streck STATS program includes personalized, easy-to-read reports that detail performance, identify trends and facilitate real-time prompt corrective action. More information can be found at [www.streck.com](http://www.streck.com).
